

# Using Bibliographies in L<sup>A</sup>T<sub>E</sub>X

Dr. Milaan Parmar

August 9, 2021

## 1 Introduction

Using and managing bibliographies in L<sup>A</sup>T<sub>E</sub>X is very easy. These are the steps required to use them:

1. Create a main document file
2. Create a project
3. Collect bibliography entries in a `.bib` file. For this:
  - Get the bibliography from Google Scholar/ACM or wherever (much easier) or
  - Write the entry yourself.
4. Add a `\bibliographystyle` and a `\bibliography` command to your document.
5. *Cite* the references where you need using the key.
6. Build the project a couple of times to get the citations in the main document.

## 2 Some Background Text

We are going to use this section to put some text in our document and at some points, we are going to inset a reference. This, for example, is going to turn into a reference [2]. This [1] is yet another reference. And so on.[3]
